

The Young Brain:

The Impact of Mental Health & Substance Use

May 15, 2020

9am - 4pm

Hilton Garden Inn
2000 Wagner Rd Ext S
Monaca, PA 15061

Adolescence is a time for significant growth-physically and emotionally. Because the young brain is not fully developed, it responds differently than an adult brain.

It is important to understand this development and how it is impacted by mental health and substance use issues.

Objectives:

- Participants will understand the basic development of adolescents
- Participants will recognize the signs and symptoms of mental health and substance use disorders in adolescents
- Participants will develop skills to work with adolescents with co-occurring issues

Presented by:

Jill Perry

Counselor, MS, NCC, LPC, CAADC, SAP

The Young Brain: Impact of Mental Health & Substance Use
