Beaver County has been building a countywide system of care (SOC) since 2006. The county has been refining its original SOC structure into a more comprehensive countywide effort. This effort is funded in part through Pennsylvania's Human Service Block grant.

Beaver County Behavioral Health (BCBH) is part of the County of Beaver and administers most of the behavioral health and human services dollars spent in Beaver County. BCBH also takes the lead in developing the Human Service Plan. As part of the planning process, we work to obtain input from all stakeholders. You can help us learn about what works and what is needed in Beaver County by completing this survey. All responses are reviewed and considered in the final plan.

Thank you in advance for your assistance.

Please take the time to complete the following survey.

All question are optional, but your feedback is important to us.

This survey link and a printable copy are also available at www.bc-systemofcare.org.

First, we'd like to know more about who is completing the survey.

Please answer honestly.

Only the combined results of this survey will be distributed.

Note: The meaning of "lived experience" is different for each individual.

It is up to you to define it for the purpose of this survey.

Once you answer the first four questions, you can skip to the populations you want to report on.

Thank you!
